Misc. Notes

22.xii.86 65a. Kepirî Diriği Mevkisi, Bozhöyük.

On next hill to west (imm. opposite höyük) (c. 400 m), small qty of sherds and Roman tile seen. Villagers said they ploughed sherds out here. From localised concentration and fact that most of field soil is utterly sterile it would seem that this area prob. contains only graves. Some bone fragments seen. Nothing collected.
